

Hussain Ali A. Aziz Ali

Information Systems Student | Hardware Technician
Nationality: Bahraini | +973 39141212 | lyrxdev@hotmail.com

Profile

Final-year Information Systems student at the University of Bahrain with a strong passion for computer hardware and cybersecurity. Experienced in building, upgrading, and troubleshooting PCs, installing and configuring operating systems, and automating post-format software deployment. Combines academic knowledge in networking, security, and cloud computing with hands-on technical skills to deliver reliable hardware and IT support solutions.

Education

- B.Sc. Information Systems, Expected: Summer 2025–2026
 - University of Bahrain, College of Information Technology

Professional Certificates

Specialization

- Cybersecurity Fundamentals Specialization – IBM, Coursera

Courses

- Introduction to Cybersecurity Tools & Cyberattacks – IBM, Coursera (Grade: 97.50%)
- Introduction to Networking – NVIDIA, Coursera (Grade: 100%)
- Introduction to Cybersecurity Essentials – IBM, Coursera (Grade: 91.33%)
- Metasploit for Beginners: Ethical Penetration Testing – Coursera (Grade: 100%)
- Introduction to Cybersecurity Careers – IBM, Coursera (Grade: 92.49%)
- What is Data Science? – IBM, Coursera (Grade: 87.49%)
- Get Started with Wrike – Coursera (Grade: 100%)
- Encryption and Cryptography Essentials – IBM, Coursera (Grade: 90%)
- Project Management: How to Create a Gantt Chart in Wrike – Coursera (Grade: 100%)
- Cybersecurity Architecture – IBM, Coursera (Grade: 96%)

Personal Projects

Post-Format Software Automation Tool

Visual Studio (.NET Framework / Windows Forms) | Personal Project

- Designed and built a Windows Forms desktop application to automate the installation of essential software immediately after a fresh Windows format.
- Reduced post-format setup time significantly by queuing and silently installing multiple programs with a single click.
- Used for real-world deployments across all family devices.

Family Device Refresh & Upgrade

Hardware & OS | Ongoing

- Reformatted and upgraded all family computers and laptops to the latest version of Windows, applying security patches and driver updates.

- Performed hardware upgrades including CPU replacements, RAM expansions, and storage upgrades (HDD to SSD) to extend device lifespan.
- Deployed the custom automation tool post-format to restore a clean, fully configured environment quickly.

Custom PC Builds & Component Upgrades

Hardware | Personal

- Built and configured multiple desktop PCs from scratch, handling component selection, assembly, BIOS setup, and OS installation.
- Upgraded GPUs, CPUs, hard drives, and RAM modules across various systems, resolving compatibility and thermal issues along the way.

Hardware & Technical Skills

- PC Building & Assembly: Full system builds from component selection to final boot; CPU, GPU, RAM, and storage installation
- Hardware Upgrades: CPU swaps, RAM upgrades, HDD→SSD migrations, GPU replacements
- BIOS / UEFI Configuration: Boot order, XMP/EXPO profiles, fan curves, secure boot
- OS Installation & Setup: Clean installs and upgrades of Windows 10/11; driver management
- Cable Management: Tidy builds for optimal airflow and aesthetics
- Hardware Troubleshooting: Diagnosing POST failures, thermal issues, compatibility conflicts
- Software: Windows 10/11, Visual Studio (.NET Framework / Windows Forms)

Relevant Coursework

- Computer Networks for IS
- Information Security I & II
- Cyber Security
- Cloud Computing I
- Database Management Systems
- Systems Analysis & Design I & II
- AI Applications in Business
- Data Mining
- Decision Support Systems
- Web Design & Development I & II
- IT Project Management
- Software Development
